# Redcare Classic

When it comes to protecting your world, a reliable alarm signalling system shouldn't be hard to come by. Redcare Classic works using your existing phone line and is backed by our unique Redcare network. That means your signal won't get lost when you need it most, so you get peace of mind without compromise.

What's more with Redcare Classic, your alarm is constantly monitored, even when your phone line is in use. The Alarm Receiving Centre (ARC) will know within seconds if it's been triggered or even if there's a fault.

---

## Features and benefits

- Redcare Classic works on any phone line provided by BT Openreach, as well as with broadband and fax machines.
- There are no additional call charges for communication between the alarm and the Redcare network.
- Constant line monitoring and 99.997% network availability makes Redcare Classic a wise investment.
- Redcare Classic can be upgraded to Redcare GSM Roaming at any time, giving you more peace of mind if you ever need it.

---

## Why choose Redcare?

Redcare sits at the heart of home and business security, bridging the gap between customers, installers and Alarm Receiving Centres. We've been in the industry for over 30 years, so you know we're a name that you can trust. Plus, we're backed by BT's trusted technology, so we're always innovating to ensure we keep your world safe and secure.

## Reliability isn't just standard, it's certified

Redcare Classic has LPS 1277 third-party certification, and exceeds European and British standards. That means you can be sure that you're always protected by a system that's independently certified to be reliable. In other words, choosing Redcare Classic means choosing a product that's always on and always secure.
