Protect your home or business  
without compromise

# Redcare Classic Fire

Redcare Classic Fire is our most popular fire product by far, and it's not hard to see why. It works with Redcare's unique signalling over an existing phone line, so it's ideal for homes and businesses where mobile signal is poor. There's no dedicated line to install, and no additional call charges either, so you get protection without compromise.

Because Redcare Classic Fire is powered by our BT Redcare network, there's no risk of an alarm signal getting lost at a crucial moment. If there's an interruption, an Alarm Receiving Centre (ARC) will know about it within 40 seconds.

---

## Features and benefits

- Redcare Classic Fire works on any line provided by BT Openreach, as well as with broadband and fax machines.
- Constant line monitoring and 99.997% network availability makes it a reliable choice for any situation.
- Redcare Classic Fire is an ideal upgrade from a 'bells only' or 'digital communicator' system, where only a siren sounds or the Alarm Receiving Centre (ARC) is alerted via a phone call.

---

## Why choose Redcare?

Redcare sits at the heart of home and business security, bridging the gap between customers, installers and Alarm Receiving Centres. We've been in the industry for over 30 years, so you know we're a name that you can trust. Plus, we're backed by BT's trusted technology, so we're always innovating to ensure we keep your world safe and secure.

## Reliability isn't just standard, it's certified

Redcare Classic Fire has LPS 1277 third-party certification, and exceeds European and British standards. Third party certification is also a mandatory requirement of the Construction Products Regulation (CPR) for all products connected to a Fire Alarm. In other words, choosing Redcare Classic Fire means choosing a product that's always on, always reliable and always secure.
