

# Redcare GSM Roaming

Product brochure

A photograph of a middle-aged man with grey hair, smiling broadly. He is wearing a light blue, vertically striped dress shirt and a dark blue tie with thin red and white diagonal stripes. He has his arms crossed and is standing in front of a large window with a white frame. The background shows a blurred view of a building and sky.

Choose an alarm signalling system  
that offers ultimate peace of mind

# Redcare GSM Roaming

Redcare GSM Roaming uses two connections for security and reliability without compromise. With Redcare's unique signalling over a phone line and backup mobile connection to our Redcare network, you'll have protection no matter what.

If the primary line connection fails, a mobile signal is primed and ready to kick in. What's more, that mobile signal is powered by our Roaming SIM, which automatically chooses the best signal from the main UK mobile networks, for rock-solid reliability.

LPS 1277: Issue 3  
Cert No. 1270a

## Reliability isn't just standard, it's certified

Redcare GSM Roaming has LPS 1277 third-party certification, and exceeds European and British standards. That means you can be sure that you're always protected by a system that's independently certified to be reliable. In other words, choosing Redcare GSM Roaming means choosing a product that's always on and always secure.

---

## Features and benefits

- There's no need for a dedicated phone line – Redcare GSM Roaming works with any BT Openreach line, even alongside broadband and fax machines.
- There are no extra call charges for communications between the alarm and the Redcare network.
- If for any reason the primary line and mobile path both fail, the Alarm Receiving Centre (ARC) will know and can take action within minutes.
- The BT Redcare Network comes with 99.997% availability, so you'll get the security you need without compromise.

---

## Why choose Redcare?

Redcare sits at the heart of home and business security, bridging the gap between customers, installers and Alarm Receiving Centres. We've been in the industry for over 30 years, so you know we're a name that you can trust. Plus, we're backed by BT's trusted technology, so we're always innovating to ensure we keep your world safe and secure.
