

# Redcare Secure 3

Product brochure

Get reliable protection for your  
world, without compromise

# Redcare Secure 3

With a primary signal powered by mobile phone technology, backed up by a secondary phone line signal, Redcare Secure 3 gives you grade 3 alarm signalling without compromise.

Redcare Secure 3's primary mobile signal is powered by our Roaming SIM. It automatically switches between the main UK mobile networks to find the best signal, even if one goes down.

If the primary signal fails, the backup signal kicks in, alerting the Alarm Receiving Centre (ARC). With two alarm signalling paths, Redcare Secure 3 is a wise investment with twice the reassurance.

LPS 1277: Issue 3  
Cert No. 1270c

## Reliability isn't just standard, it's certified

Redcare Secure 3 has LPS 1277 third-party certification, and exceeds European and British standards. That means you can be sure that you're always protected by a system that's independently certified to be reliable. In other words, choosing Redcare Secure 3 means choosing a product that's always on and always secure.

---

## Features and benefits

- There are no additional setup costs and no extra call charges.
- Redcare Secure 3 can be installed anytime with our easy network connection.
- With a remote manager web portal, your installer can access Redcare Secure 3 for diagnostics and servicing\* without interrupting your day.
- Redcare Secure 3 can be upgraded to the Secure IP system easily, without the need for any hardware changes.

---

## Why choose Redcare?

Redcare sits at the heart of home and business security, bridging the gap between customers, installers and Alarm Receiving Centres. We've been in the industry for over 30 years, so you know we're a name that you can trust. Plus, we're backed by BT's trusted technology, so we're always innovating to ensure we keep your world safe and secure.
