

Redcare Secure IP

Product brochure

Get the highest possible
protection for your world

Redcare Secure IP

Redcare Secure IP uses IP technology over a broadband or network as the primary alarm signalling path, with backup provided by a mobile network connection. Together, they make Redcare Secure IP one of the highest rated and most secure Redcare alarm signalling systems you can get.

With Redcare Secure IP, if the primary IP signal fails, our intelligent roaming mobile connection kicks in, giving you the security and peace of mind you need, when you need it most. It's the perfect combination of online and mobile signalling.

Features and benefits

- Our intelligent Roaming SIM powers the backup mobile connection and automatically switches between the main UK mobile networks for the best signal.
- Redcare Secure IP can be installed anytime with our easy network connection.
- With a remote manager web portal, your installer can access Redcare Secure IP for diagnostics and servicing* without interrupting your day.

Why choose Redcare?

Redcare sits at the heart of home and business security, bridging the gap between customers, installers and Alarm Receiving Centres. We've been in the industry for over 30 years, so you know we're a name that you can trust. Plus, we're backed by BT's trusted technology, so we're always innovating to ensure we keep your world safe and secure.

Reliability isn't just standard, it's certified

Redcare Secure IP has LPS 1277 third-party certification, and exceeds European and British standards. That means you can be sure that you're always protected by a system that's independently certified to be reliable. In other words, choosing Redcare Secure IP means choosing a product that's always on and always secure.
