

# Redcare Secure Solo

Product brochure

Protect what's important, wherever you are, with mobile alarm signalling

## Redcare Secure Solo

Redcare Secure Solo uses mobile phone technology, so it's the perfect solution if you're located somewhere where there's good mobile signal but no landline. Better still, it's powered by our Roaming SIM, which automatically switches between the main UK mobile networks for the best and most reliable signal.

We know your situation might change, so Redcare Secure Solo is built to adapt. It's quick to install and easy to move from location to location. It can also be upgraded to one of our other Redcare Secure intruder alarm signalling products at any time.

LPS 1277: Issue 3  
Cert No. 1270c

## Reliability isn't just standard, it's certified

Redcare Secure Solo has LPS 1277 third-party certification, and exceeds European and British standards. That means you can be sure that you're always protected by a system that's independently certified to be reliable. In other words, choosing Redcare Secure Solo means choosing a product that's always secure.

---

## Features and benefits

- Our intelligent Roaming SIM comes as standard and automatically chooses the best signal from the main UK mobile networks.
- Redcare Secure Solo is built for flexibility, it's quick to install and can easily be moved from location to location, making it ideal for non-fixed properties like boats and heavy machinery.
- With a remote manager web portal, your installer has access to remote diagnostics and servicing\*, meaning they can work remotely without disturbing you.

---

## Why choose Redcare?

Redcare sits at the heart of home and business security, bridging the gap between customers, installers and Alarm Receiving Centres. We've been in the industry for over 30 years, so you know we're a name that you can trust. Plus, we're backed by BT's trusted technology, so we're always innovating to ensure we keep your world safe and secure.
